

Abdelmajid Jallouli

IT ARCHITECTURE & CLOUD COMPUTING ENGINEER

✉ jalloulimajdou@gmail.com ☎ +216 56 50 36 62 🌐 GitHub 🔗 LinkedIn

Education

National Engineering Degree in Computer Science, *École supérieure privée d'ingénierie et de technologie (ESPRIT)* 2026
Baccalaureate, Mathematics track, *Lycée Mohamed Boudhina* 2022

Certifications

CCNA: Switching, Routing and Wireless Essentials – Cisco, 2024

Experience

Internship – Web Application for Company Users & Setup of a CI/CD Pipeline and Cloud Infrastructure, *Société Amine de Gestion des Entreprises* 07/2026 – 08/2026

- Designed and developed a web management application for company users.
- Set up a **CI/CD** pipeline with **Jenkins** to automate builds and deployments.
- Containerized the application with **Docker/Podman** and orchestrated it via **Kubernetes (Rancher)**.
- Automated infrastructure deployment using **Terraform (IaC)**.
- Set up a monitoring solution with **Prometheus** and **Grafana**.

Internship – Desktop Application for Balance Sheet Management, *Société Amine de Gestion des Entreprises* 07/2025 – 08/2025

- Designed a data model dedicated to managing the company's financial balance sheets, along with the associated business logic.
- Developed the backend with **PHP**, **Symfony**, and **Doctrine ORM** for data persistence and calculation logic.
- Built data entry and consultation interfaces with **Twig**, **Bootstrap**, and **AJAX** for dynamic updates without page reloads.

Internship – Firewall Configuration and Management, *Tunisair* 07/2023

- Configured and managed firewalls to secure the company's network infrastructure.

University Projects

Integrated Project – DevOps: Multi-Function University Platform & Private Cloud, *ESPRIT* 2025 – 2026

- Built a private cloud with **OpenStack** (Nova, Neutron, Keystone, Cinder...).
- Automated **Docker** and **Kubernetes** deployment via **Ansible** playbooks.
- Set up monitoring and visualization with **Prometheus** and **Grafana**.
- Developed a multi-function web platform for the university with **Spring Boot** (backend) and **Angular** (frontend).
- Deployed the application on the OpenStack private cloud to ensure flexibility and performance.
- Hosted the database on **Microsoft Azure** to ensure high availability and security.

Integrated Project – Local Lens, Urban Exploration Platform (SmartCity), *ESPRIT* 2024 – 2025

- Built an urban exploration platform enabling users to discover points of interest, join community clubs, plan their trips, access public services, and interact through a social feed.
- Designed and developed the desktop application with **JavaFX** (FXML, CSS, QML) on the client side and **Java/Maven** on the server side.
- Implemented advanced facial-recognition authentication (**OpenCV 4.9**, **DeepFace4j**) combined with Google Auth integration.
- Integrated multiple external APIs (Google Maps, Foursquare, OpenWeather, SightEngine, OpenAI/Gemini) for mapping, automatic content moderation, and AI-generated descriptions.
- Interactive mapping with **Leaflet.js**, PDF report export, QR-code event ticket generation, and an email notification system.

Integrated Project – Gym Management Application, *ESPRIT* 2023 – 2024

- Developed a desktop gym management application in **C++** with **Qt** graphical interfaces.

Integrated Project – ESPRIT SDL Game Development, *ESPRIT* 2022 – 2023

- Designed and developed a video game in **C/C++** using the **SDL** (Simple DirectMedia Layer) library.
